PERSONAL PROJECTS

Airbnb clone (Collaborative project)

- I created a clone of the Airbnb website where travelers can book the properties available along with my 2 teammates who are from different parts of the country with remote collaboration in 10 days.
- Tools used : React, Redux, Bootstrap, Flask, MySQL

Payment Management System

- I have developed a simple payment management system application where the user can keep track of the expenses he made and can visualize through charts.
- Tools used : React, Redux, Material-ui

Word Counter - 36 Hours Hackathon

- I and my teammate Krushna Das created an add-on for Firefox browser which calculates the number of characters, words, sentence paragraph length, and includes dictionary support. It is approved by the official Mozilla community.

Google Timer

- I have developed a React application which replicates the google timer.
- Tools used : React, Bootstrap

Zerodha Clone

- I have created a UI clone of the zerodha website
- Tools used : React, Bootstrap
